

Intel Q1 2026

Human Arm Reading Sheet, Full document

David Eji, rater offset A

August 10, 2026

The rules, agreed before any of this was scored

- **What counts as a HOLD.** If the share price moves less than 2% overnight, that counts as no real move. Further out the band widens, because over several days a stock drifts anyway, and we set it so roughly the same share of events still count as HOLD.
- **Write a score, not a decision.** You give a number. The sheet turns it into BUY, HOLD or SELL for you: anything between -0.20 and $+0.20$ is a HOLD, above that a BUY, below it a SELL. Do not work it out yourself, or the rule stops being fixed in advance.
- **Do not look at the price until your score is sealed.** If you see one by accident, say so in the peeked box. Owning up costs us one event. Hiding it costs us the whole result.
- **Time yourself.** How long a read takes is half of what we are measuring, since the point is to compare it against what the model costs.
- **If you used AI at any point, write it down.**
- **When this one came out.** Intel reports after the market has closed, so we measure from that afternoon's closing price to the next morning's opening price.
- **Once you seal the first read, leave it alone.** Do not go back and tidy it up after the second read. That is the one thing there is no fixing later.

What you are reading

Reference	INTC-20260423
Company	Intel Corporation
Ticker	INTC
Quarter	Q1 2026
Reported on	23 April 2026
Which part you get	full
Where to find it	Intel Q1 2026 press release and call transcript
How to read it	Cold. No charts, no news, no previews, no price screen.

Your hunch, written once per company before you start

One line, written before you open anything: what do you think actually moves this stock? Writing it down first turns a hunch into something you can be proved wrong about, rather than an explanation you reach for afterwards.

This name lives on the foundry losses and the cash burn, not on the revenue line.

FIRST READ, Full document

What to read. Read the whole thing: the numbers, the outlook and the Q&A. This quarter is one pass only, so there is no second read.

Timer

Start timing before you open anything. Stop when the score is written down.

minutes taken	38
saw a price first?	no
used AI?	no

Your score

Score: +0.35

Call: BUY (*worked out by the formula*)

Why. Full read. Foundry approaching breakeven, external customers named, and the first quarter in two years where the turnaround has numbers behind it rather than intentions.

FIRST READ SEALED, do not come back to it

What the market did, only once everything above is sealed

These come from the shared price data rather than from you. Do check the overnight number against a chart once for this company though. A company reporting before the open is measured from the previous day's close; one reporting after the close is measured from that day's close. Getting it the wrong way round flips the answer.

	Raw	Excess	Band	P1 holds	P2 holds
anchor date					23 April 2026
baseline close (\$)					\$66.78
reaction open (\$)					\$82.20
Overnight	+23.09%	+22.77%	2.00%	yes	—
D+3	+26.56%	+26.11%	3.94%	yes	—
D+5	+41.48%	+40.04%	5.20%	yes	—
D+10	+64.15%	+60.89%	5.20%	yes	—

The band widens further out because a stock drifts over several days whatever the earnings said. Each one is set so roughly the same share of events still count as HOLD. These are fitted on twenty events, so treat them as rough and redo them once everyone's readings are pooled.

How the calls did

- Did it move more than 2% overnight? It moved +23.09%, so yes, that is outside the band
- So the right call was: **BUY**
- First read: **RIGHT** Second read: n/a, only one read this quarter
- Did the second read change the call? n/a, only one read this quarter

The second read is not independent of the first, since a call had already been committed to and people rarely talk themselves out of one. Read any flip as a floor on how much the extra material actually mattered, not a measure of it.
